Input modalities

Which biomarkers depend on symptoms

Common: Diaries, Assessments, Sensors

S.o.A: Wearables, Chatbot, Combinations (AI)

Wearables (data heavy)

More and more advanced and reliable, objective

HRV, Skin Conductivity, ECG, BP, BR, SPO2, HR, ACC

Biomarkers:

Stress, Sleep,
Relaxation, Anxiety
Activity, LifeStyle,
Patterns

Chatbot (quick)

Fast interaction, low obtrusive, relatable, subjective

Chatbot can be used to react on situations

Personaliseable

"Learns" about patient preferences

Chatbot

European Regional Development Fund

(1) matig

Bas Goossen 14-2-22 10:21 V

Chatbot

eMEN

Combining (AI)

Initial set-up based on assessment

Reacting on measurements to get a subjective review

Increasing reliability of measurement

Differentiating disstress from eustress

Quick non-obtrusive annotation of events

Changing tone based on measurements and events

Remote interventions

Effective "interinterval" intervention

Tele-Consultation
Tele-EMDR
Tele-Exposure*

*Currently being developed/tested in Cooperation with ARQ
